

Commercial Water Softening Systems Sizing & Design Questionnaire

Project Name _____

Project Location _____

Engineer/Contractor/Rep Name(s) _____

1) Incoming (raw) water quality levels (Grains per gallon or mg/l hardness, iron ppm): _____

2) Incoming water pressure (psi): _____

3) Softening (Check one): Hot only Hot and Cold

4) Peak flow rate (gpm) required through softening system (if known): _____

5) If peak flow rate is not known, please list all fixtures/equipment (and quantities) to receive soft water:

6) Estimated gallons-per-day usage for all fixtures/equipment using softened water (if known): _____

7) If GPD not known, please give some information on how many occupants or users the facility might have on a typical day: _____

8) Do you require a packaged skid system (pre-piped, pre-wired, pre-plumbed, delivered to jobsite)? Yes No

9) If you answered yes to #8, how wide is the mechanical room door? _____

10) If you answered yes to #8, how tall is the mechanical room ceiling? _____

11) Do you want to consider brine (salt) or softener wastewater reclamation? Yes No

12) Other comments or requests:

Thank you for working with Water Control. We value your business. Please fax, email, or mail this questionnaire to us (or to your local representative) for processing and system selection.
