

Look for the Water-Aware seal

Dear Customer,

Throughout this catalog, you will find products marked with the green and blue Water-Aware seal.

This seal is our indication that there are potential LEED® point contributions to be gained by specifying these products. Moreover, it is a sign of Water Control's commitment to developing and pioneering the very latest, and "greenest," in water conditioning and filtration technology. Products bearing the Water-Aware seal include:

- Water and salt-saving residential and commercial softeners
- Chemical-free residential and commercial iron filters
- Water Reclamation Systems
- Non-chemical, non-backwashing Scale Elimination Systems (a greener alternative to commercial water softeners in many applications).

Water Control Corporation is dedicated to the well-being of the plumbing industry. Whether you are a mechanical engineer, designer, contractor, or wholesaler, you can count on our loyalty and our full support every step of the way.

We thank you for your business and look forward to serving you.

Warmest Regards,

The Water Control Team
